

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-12 (canceled)

Claim 13 (currently amended): A flying disc, comprising:

a flight deck section having a plurality of contoured features, wherein each of said contoured features define a cavity within said flight deck section;  
a rim integral with said flight deck section; and  
The flying disc according to claim 12 wherein each of said contoured features protrude beneath a plane defined by said flight deck section and wherein at least two of said contoured features are equal-distantly spaced from the central axis of said disc as measure in the radial direction from the central axis.

14. (original): The flying disc according to claim 13 wherein said contoured features are positioned at two or more distances as radially measured from the central axis of said disc.

Claim 15 (canceled)

16. (currently amended): The flying disc according to claim 14 wherein said contoured features are positioned in an eccentric, semi-circular pattern.

17. (original): The flying disc according to claim 12 wherein each of said contoured features are positioned at a different distance from the central axis of said disc as measured in the radial direction from the central axis.

18. (original): The flying disc according to claim [[16]] 17 wherein the contoured

features are positioned in a spiral pattern.

Claims 19-20 (canceled)

Claim 21 (new): The flying disc according to claim 13 wherein the cavities extend beneath the plane defined by said flight deck section.

Claim 22 (new): The flying disc according to claim 13 wherein said contoured features include a downwardly angled generally U-shaped first section and an upwardly angled generally C-shaped second section.

Claim 23 (new): The flying disc according to claim 13 wherein the cavities have a maximum depth in a range from 0.35 cm to 0.55 cm.

Claim 24 (new): The flying disc according to claim 13 wherein the cavities have a span along their major axis in a range from 1.5 cm to 3.5 cm.

Claim 25 (new): The flying disc according to claim 13 wherein the cavities have a maximum depth in a range from 0.35 cm to 0.45 cm and a span along their major axis in a range from 2.0 cm to 2.5 cm.

Claim 26 (new): The flying disc according to claim 13 wherein said contoured features include at least one gripping rib.

Claim 27 (new): The flying disc according to claim 17 wherein the cavities extend beneath the plane defined by said flight deck section.

Claim 28 (new): The flying disc according to claim 17 wherein said contoured features include a downwardly angled generally U-shaped first section and an upwardly angled generally C-shaped second section.

Claim 29 (new): The flying disc according to claim 17 wherein the cavities have a maximum depth in a range from 0.35 cm to 0.55 cm.

Claim 30 (new): The flying disc according to claim 17 wherein the cavities have a span along their major axis in a range from 1.5 cm to 3.5 cm.

Claim 31 (new): The flying disc according to claim 17 wherein the cavities have a maximum depth in a range from 0.35 cm to 0.45 cm and a span along their major axis in a range from 2.0 cm to 2.5 cm.

Claim 32 (new): The flying disc according to claim 17 wherein said contoured features include at least one gripping rib.
